

## Parameters

| Product code            | Rated current | Breaking capacity | Safety certificate |    |    | Recommended Fuse Link Model/Size | Net weight |
|-------------------------|---------------|-------------------|--------------------|----|----|----------------------------------|------------|
|                         |               |                   | △                  | CE | UL |                                  |            |
| MFG360-1000VDC103832AFH | 30A           | 1000Vdc           | •                  | •  | •  | 1000VDC Fuse - 10.3x38 mm        | 58.5g      |

Note: • DENOTES FOR CERTIFICATION APPROVED; ◦ DENOTES FOR PENDING CERTIFICATION

Equipped with TH35-7.5 mounting rail

Note: This base can provide 1P, 2P, 3P, 4P for selection

MFG360-1000VDC103832AFH is a 1 Pole, 1000V DC, 32A, 10x38mm Fuse Holder that provides reliable protection for electrical circuits. Designed to accommodate DC Voltage fuses up to 32A and maximum voltage of 1000V DC, it ensures safety and efficiency in various applications. With its durable construction and precise engineering, this fuse holder offers peace of mind for your electrical needs. It mounts to 35mm DIN Rail. The Fuse Holder Housing is made of high temperature resistant plastics with elevated insulation characteristics. Fuse is not included.

### Key Features & Benefits:

- 1000VDC 10x38mm Fuse Link recommended
- 1000VDC Photovoltaic (PV) system available
- 30A ampere ratings
- Available in 1, 2, 3 and 4-pole configurations
- Meets IEC and UL standards for global acceptance
- TUV, CE, UL approved
- Flame retardant shell with V0 standard
- Low temperature rise for better performance of the circuit protection
- DIN Rail mounting
- No fuse pullers or tools required for fuse removal
